

I am a flight attendant and am writing about why allowing cell phone use in flights is irresponsible and a bad idea. There is no evidence that cell phone use doesn't interfere with navigational instruments. Cell phone use would enable terrorists to coordinate plan of action more effectively. The NPRM would leave it up to flight attendants to police the use of cell phones onboard the aircraft compromising our ability to maintain safe secure cabin environment and to conduct emergency evacuations. It would make an already tense cabin environment even more stressful. Thank you for your time and reading my concerns.
